Officially listed in / Quality conforms to

Product properties

Appearance

Clear, colourless liquid

Example of use

Possible uses in the techno-chemical field are acidic as well as alkaline liquid formulations.

In comparison with fatty alcohol-EO/PO adducts of equal hydrophilic nature the consumption of hydrotrope (e. g. Na-Cumene sulphonate) by DEHYPON LS 104 L is considerably lower. For this reason DEHYPON LS 104 L is especially suitable for use in acidic and neutral clear rinsing agent formulations.

DEHYPON LS 104 L is a low-foaming surfactant with a well-developed wetting power. With regard to caustic solutions and acids, it has a very good stability. The product is miscible with all anionic, cationic and nonionic surfactants
