

# COSMEDIA® GUAR C 261 N

## Labeling information

### INCI name(s)

Guar Hydroxypropyl Trimonium Chloride

## Registrations

Ingredient	CASR-No.	EINECS/ELINCS-No.
	65497-29-2	polymer

## Officially listed in / Quality conforms to

JCIC: O-{2-Hydroxy-3-(trimethylammonio)propyl} Guar Gum Chloride  
(Ingredient Code 523039)

## Product properties

### Appearance

COSMEDIA® GUAR C 261 N is a white to yellow fine powder with a characteristic intrinsic odour.

### Example of use

Because of its cationic character COSMEDIA® GUAR C 261 N is substantive to hair and has a favorable effect on wet and dry combability. Its compatibility with anionic surfactants makes this cationic guar derivative a universally usable conditioning agent in shampoos and hair aftertreatment agents. COSMEDIA® GUAR C 261 N is cold processable and forms slightly cloudy swellings in water. It is therefore preferentially used in emulsion-type or pearlescent preparations.

## Characteristic values

The specifications stated in the paragraphs 'Quality control data' and 'Additional product descriptive data' finally and conclusively describe the properties of the Product.

### Quality control data

(Data which is used for quality release and is certified for each batch.)

Appearance	conforms to standard	
Odour	conforms to standard	
Active substance	min. 90 %	Difference(100%-H <sub>2</sub> O)
Water	max. 10 %	DGF C-III 13 a
pH-value (1% aqueous solution)	9.5 - 11.0	DGF H-III 1

### Additional product descriptive data

(Data which is proven statistically but not determined regularly.)

## Storage and transportation

In original sealed containers and at room temperatures below 30°C COSMEDIA® GUAR C 261 N remains stable for at least one year. Under proper storage conditions germ formations are excluded. COSMEDIA® GUAR C 261 N meets the following microbiological criteria:

Aerobic organisms < 1000 colony forming units/g  
Fungi/Yeasts < 100 colony forming units/g  
COSMEDIA® GUAR C 261 N does not contain preservatives.
