

## Labeling information

### INCI name(s)

Sodium Cocoamphoacetate

## Registrations

Ingredient	CASR-No.	EINECS/ELINCS-No.	others
	61791-32-0	2631644	

## Officially listed in / Quality conforms to

## Product properties

### Appearance

Clear low viscous yellowish liquid with a slight inherent odour.

### Example of use

DEHYTON® MC is a well compatible amphoteric surfactant suitable for the application in mild surfactant preparations. In combination with anionic surfactants, synergistic effects are achieved which lead to a dermatologically improved final product.

## Characteristic values

The specifications stated in the paragraphs 'Quality control data' and 'Additional product descriptive data' finally and conclusively describe the properties of the Product.

### Quality control data

(Data which is used for quality release and is certified for each batch.)

Appearance	conforms to standard	
Odour	conforms to standard	
pH(20% solution)	8.5 - 9.5	UNE EN 1262
Solid content	38 - 41 %	100 - % water KF (EN 13267)
Sodium Chloride	6.5 - 7.5 %	ISO 4323:1977

### Additional product descriptive data

(Data which is proven statistically but not determined regularly.)

Gardner colour	max. 3
----------------	--------

## Storage and transportation

In unopened original containers and at temperatures between +15°C and +30°C the product can be stored for at least one year. Storage at temperatures below + 15°C could lead to turbidities in the product, then the container must be heated while stirring. The temperature-induced turbidity has no influence on the product quality. Due to its high salt content DEHYTON® MC can have a corrosive effect during storage in stainless steel tanks. DEHYTON® MC is delivered unpreserved.
